Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## Status

- 1) ☒ Responsive to communication(s) filed on 30 July 2003.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

## Disposition of Claims

***Claim Rejections - 35 USC § 103***

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

Claims 1 and 2 are rejected under 35 U.S.C. 103(a) as being unpatentable over Rolland (3,695,012).

Rolland discloses a filter assembly comprising a filter material (75) wherein the filter material is curved up and down continuously and formed with a corrugated structure, between every two curved portions formed a V-shaped air intake groove, and a frame (62) with an upper side of the frame having its outer lower edge formed with a straight vertical surface (63 & 64) extending upward and inward to form a current guiding surface (70 & 71) of a preset curve. It would have been obvious to a person having ordinary skill in the art at the time the invention was made to provide a frame

with curved sections as taught by Rolland since the curved section would guide the air stream toward the filter material inside the frame for efficient filtration.

Claims 3-7 are rejected under 35 U.S.C. 103(a) as being unpatentable over Rolland (3,695,012), in view of Chapman (6,322,615 B1).

Claims 3-7 call for the filter material composed of a filter and a metallic gauze. Chapman discloses a filter media (3) is sandwiched between a filter metallic gauze (1) on each side of the filter media (3). It would have been obvious to a person having ordinary skill in the art at the time the invention was made to provide a filter metallic gauze as taught by Chapman on 2 sides of the filter media of Rolland so that the gauze would provide support for the filter media against a stream of air flow therethrough.

### ***Conclusion***

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

- Adams et al (6,336,946 B1) disclose a pleat air filter.
- Kometani et al (5,720,790) disclose a filter element.
- Moll et al (5,679,122) disclose a filter for filtration of a fluid flow.
- Brixius et al (3,698,161) disclose an air filter.
